Subject: RE: NJDEP request for EPA-NERL lab analysis

Having already looked at samples in that area I don't think the data analysis will take nearly as long. Doubly so if they are only interested in the Solvay chemicals. I intended to process and spike with the internal standard along with the MI samples.

I will be much more comfortable with timelines once I have my instruments working again. The labs are "open" but neither the QQQ or the Orbitrap instrument is up in running and one definitely needs service, the other just might need service if I can't troubleshoot it today.

They will be looking for NTA and probably best to figure we'll need to the internally labeled thing. They will primarily be interested in the Solvay CIPFEPKA compound(s). They may reduce the need for exhaustive NTA compound review?

If I add them to the Michigan processing set then the timeline for analysis would be second week of September most likely. We are assuming the labs will be functional again starting the second week of August.

Subject: FW: NJDEP request for EPA-NERL lab analysis

James and Myriam

Tim sent this request from NJDEP a couple of weeks ago—I just found it.

James, last week we talked about maybe getting some samples from NJ to add to the Michigan coming this week. NJ is not interested in targeted analysis so they let that pass. However, this request is for NTA doing semi-quantitative on NJ wells (internally labeled). They say about 15 samples.

Can you accommodate this request and on what schedule?

I'll call tomorrow to chat.

Kate

Myriam and Kate,

See request below. I have forwarded to TimW for approval. Anticipating his approval, can the two of you be thinking about how and when we might be able to get this done?

Thanks.

Tim
